Allowable Subject Matter

1. After a further search and a thorough examination of the present application and in light of the Applicant's arguments and in light of the prior art made of record, claims 1, 3-12, and 14-20 are found to be in condition for allowance.

Reasons for Allowance

2. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

The claims are allowable over the prior art of record since the cited reference taken individually or in combination fails to particularly disclose a decoder comprising a controller configured to control the decoding of enhancement layer of an input stream, based on a user defined subset of a base-layer output stream, wherein the base-layer input stream corresponds to an encoding of a series of image frames, the defined subset of the base layer outputs streams includes a defined region within the image frames that is smaller in size than the image frames.

It is noted that the closest prior art of record (Horne US Patent no. 5,515,377) teaches a similar decoder, however, Horne fails to particularly teach or suggest "*control the decoding of the enhancement layer of an input stream, based on a user defined subset of a base-layer output stream, wherein the base-layer input stream corresponds to an encoding of a series of image frames, the defined subset of the base layer outputs streams includes a defined*

region within the image frames that is smaller in size than the image frames” as specified in the claims.

Conclusion

3. Any comments considered necessary by applicant must be submitted no later than the payment of issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submission should be clearly labeled “Comments on Statement of Reasons for Allowance”.
